The Soul-Mate Provider.

was no organization at all except as it Miss Grey confessed that she had sent deal of mency and for a long time a mystery. If she had confined her operations to finding soul mates for the thousands of girls in the watch factories of the town she might have amassed a fortune. But she sought fame as an affinity joiner mails led a postoffice inspector to her and then a homely wife or a husband with richly furnished suite of offices after she had taken in about \$3,000 in three months.

The postal inspector pretended to be in war on the "Affinity trust" there was no search of an affinity. He did not make inkling of the organization of such a misrepresentation. He was hunting for monopoly. Chicago clergymen, to be sure, the "beautiful young widow, posessed of of John A. Logan of Carmi, Ill., supplied had reported a constant diminution of mar- 535,000," whom Miss Grey had selected by Miss Grey. She corresponded with him riages effected through the ordinary chan- as the affinity of William Graybell, a several months. She saw him for the first nels, but this condition was ascribed to lank farmer of Dearborn, Mo. The Mis- time in the court room, and learned then young men's growing aversion to con- sourisn accepted and married the woman tracting additional responsibilities in days to whom Miss Grey had introduced him legs being paralyzed. Miss Bolen was a when salaries seemed out of proportion to by mail, but he said she was homely, vivacious, handsome girl, but she could no penniless and misrepresented. He had be induced to believe that her natural Nobedy suspected that the old-fashioned wooed a beauty by mall, but wedded a affinity was a young man who could not

girls?" was asked of Mrs. Scott.

"This is undoubtedly true in some stances," she replied, "but I'll tell you many people who are anxious to win soul mates.

NOW FIRELESS LOCOMOTIVES Construction and Utility of a Novel Switch Engine in Use in Germany.

The fireless recometive follows the fireless stove into the list of twentieth century wonders. It is "made in Germany." A special agent of the United States, in a report to the Department of Commerce and Labor, gives the following details: As the name implies, the locomotive is

whome who will a some the second some of the second Speaking generally, this fireless locomo-

tive is really an accumulator engine, the steam for the engine. It goes without say- after the expiration of several hours it can What appears to the authorities as most it g that in default of fire the steam depower. When steam is brought from the "Are most of your patrons giddy boys and boiler of the stationary plant to the locomotive it is precipitated in the cooler water of the engine boller and gives up its heat to the same until the temperature and preswould be shocked to know the high class sure in both bollers are nearly the same. This is the exact reverse of the evaporat-Why, there's one good fat check among my ing process during the working of the engetting a wealthy railroad man a pretty aside the probable water losses through leakages and such reasons, the water level in the boiler, after filling up, will always remain the same without the water being actually admitted. Since each engine is only provided with a certain amount of energy its radius is limited.

There is no question but that the fireless locomotive is in demand by European firms; and for some of our government plants and at those private establishments where fire protection is a first consideration this type of motor power should prove of great value. Summed up briefly, this type of engine offers absolute safety fireless. There is no fire box. In general against fire which might be caused by mank on the front porch, when there was light club \$5 to "discover his affinity." Miss Grey was convicted of operating a Hart and Morris fied. Their principal tools nary type of locomotive minus the fire box, eliminated. This permits of the machine

machine is not in operation the services Practically there is little or no repairs.

needed on one of these machines; since there is no fire box, the strain on the boiler is practically nil. The engine can be made ready for service in a very short time, and when once charged is ready for work at a moment's notice. If it is not be brought into play. From this it will be velopment is effected at the expense of the seen that the special province of this type of machine is interrupted work.
